

# PREPARATION FOR COCKROACH SPRAY TREATMENT

PEOPLE & PETS MUST REMAIN OUT OF UNIT FOR 6 HOURS. INFORM US IF YOU HAVE AN ALLERGY OR ARE PREGNANT.

PLEASE FOLLOW THE INSTRUCTIONS BELOW:

## Kitchen

- o Remove dishes, food packages, and containers from top & bottom cabinets.
- o Remove old shelf paper.
- o Wash all surfaces with soap and water.
- o Empty and remove the drawers.
- o Do not place dishes, food packages, or containers on the counters.
- o Empty the kitchen sink.
- o Move all items from the top of the fridge.

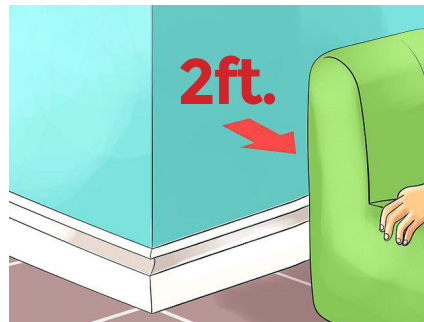

### Optional

Move the fridge & stove out if you are able.  
Remove the electrical outlet plates if you are able.

## Closets

- o Empty all closets of shoes, clothes, boxes, or any other items.

## Baseboards

- o Leave access to all baseboards throughout the unit.

## Bathroom

- o Remove all items from shelving and drawers, including vanity drawers.
- o Empty the medicine cabinet.

## Vacuum/Wash

Vacuuming and washing are very important in getting rid of cockroaches and in keeping them from coming back.

## Other Rooms

(Only rooms where cockroach activity has been seen)

- o Move all furniture 2ft away from the wall.
- o Clean all items off the floor and vacuum.
- o If seen in furniture such as dressers, night stands, etc., empty the contents of these and vacuum out.

## Sanitation

Cleanliness is the key to gaining control over these resilient pests.

## Inform Us

Please call if a problem exists after 21 days.
